

SMART Goals Assessment

Ibrahim Mammadov

Undergraduate Competency One:

Critical Thinking and Problem Solving Skills

SMART Goal 1:

By March 13th, 2026, I will strengthen my ability to address difficulties in future work-based projects by figuring out the root problems and writing out at least two potential solutions before acting. I will consult with my team members to get more clarity and ensure I am looking at the right issue in the case that I remain stuck.

SMART Goal 2:

By March 13th, 2026, I will make decisions by considering the results of each work-based project, recording what succeeded and what failed, and applying those insights to subsequent projects.

Why have you selected this competency?

I have selected this competency since it is crucial for me to build up my confidence when I am making choices by myself. I try to approach situations with curiosity, consider other viewpoints, and come up with well-considered, fact-based solutions rather than constantly looking to people for validation. With this approach, I will be able to handle obstacles with greater assurance and contribute more successfully to assignments at work and in the classroom as a result as a whole.

Undergraduate Competency Two:

Collaboration Across Networks and Leading With Influence

SMART Goal 1:

By March 2nd, 2026, I will enhance my ability to collaborate with others by taking part in at least one weekly Slack team meeting. In the meetings, I will proactively exchange information, pose queries, and offer comments to maintain project progress alignment.

SMART Goal 2:

By April 3rd, 2026, I will improve my leadership abilities by taking the initiative to suggest solutions for at least two team projects, clearly communicate them to the group, and promote discussion to successfully inform choices.

Why have you selected this competency?

I have selected this competency since I aim to become a more well-rounded team member. Enhancing my teamwork and leadership abilities will enable me to make contributions, communicate effectively, and direct choices, setting me up for future academic and professional endeavors.

SMART Goals Assessment

Ibrahim Mammadov

Undergraduate Competency Three:

Curiosity and Imagination

SMART Goal 1:

By March 13th, 2026, I will expand my creativity by investigating at least two cutting-edge approaches or solutions in my industry every month and considering how I may incorporate them into my work.

SMART Goal 2:

By April 3rd, 2026, I will foster curiosity by posing at least two intelligent questions every week at team meetings or project talks in order to gain a deeper comprehension of the issue or project context.

Why have you selected this competency?

I have selected this competency since I want to boost my creativity and be more open-minded. By cultivating my creativity and curiosity, I may investigate novel ideas, pose meaningful queries, and contribute innovative solutions to tasks, all of which contribute to my professional and personal development.
